Computer Science Graduate | Python and Backend Development

Computer science graduate with Python application and JavaScript backend project experience. Built NeuroLearn with Python, Dash and Plotly and led backend development for StudentConnect using Node.js, Express and MongoDB.

Technical Skills

Languages: Python, JavaScript, SQL, HTML/CSS

Development: Node.js, Express, Dash, REST APIs, MongoDB, Mongoose

Testing and tools: pytest, Postman, Excel

Professional Experience

Good Eggs | May 2025–Present

Warehouse operations; currently Warehouse Dispatcher

Additional technical responsibilities since August 2026

- Prepared delivery data for internal requests by filtering records and organizing columns.
- Helped IT and engineering colleagues troubleshoot connectivity issues by reviewing diagnostic information and sharing findings.

Selected Projects

NeuroLearn | Python, Dash, Plotly, OpenAI API, pytest | Jan–Nov 2025

- Developed an interactive web application for exploring brain anatomy, functions, and related disorders through a 3D model and an OpenAI API integration.
- Implemented backend request handling, input validation, environment-based configuration, and per-IP rate limiting.

github.com/LucaT445/NeuroLearn

StudentConnect | Node.js, Express, MongoDB, Mongoose | Jan–May 2024

- Led backend development for a team-built student–teacher communication platform, building a REST API with layered architecture, CRUD operations, and data validation.
- Modeled application data with Mongoose and tested API routes and expected JSON responses using Postman.

Education

B.S. Computer Science | San Francisco State University | December 2024

Relevant coursework: Data Structures, Algorithms, Databases, Software Engineering, Operating Systems.

Data Science Certificate Studies | University of California, Berkeley | In progress

Recent coursework: Python data analysis, Naive Bayes classification, and k-nearest neighbors classification.
